

AN OMEGA MORGAN® COMPANY

INDUSTRY:

Power Industry at a Data Center

PROJECT TYPE:

Rigging

PROJECT OVERVIEW:

Intermountain Rigging and Heavyhaul executed a large-scale rigging project at a generator plant located on a data center campus in West Jordan, UT. While the customer initially tasked IRH with setting machinery to ensure the plant's 72-unit engines and alternators continued to run seamlessly, the project expanded; IRH provided additional services that were essential to keeping operations moving.

EQUIPMENT USED:

Various telehandlers, 80k Versa-Lift, 60k Versa-Lift, Man baskets, Enerpac pump system, 275-ton crane

PROJECT:

RIGGING EXPERTISE FOR A GENERATOR PLANT
